

Check out how much insulation was put in downstairs! Awesome.

these stairs always look nasty and have had a tough 88 years.

Stairway to basement
on Jan. 4, 2010

Framing and insulation below stairs to basement in Late November.

Below 12-21-09

The view under the stairs and where two new windows are sitting. Yes, 2 photos were overlapped on purpose hopefully to show a wider angle to appreciate the work that's been done.

Windows are here

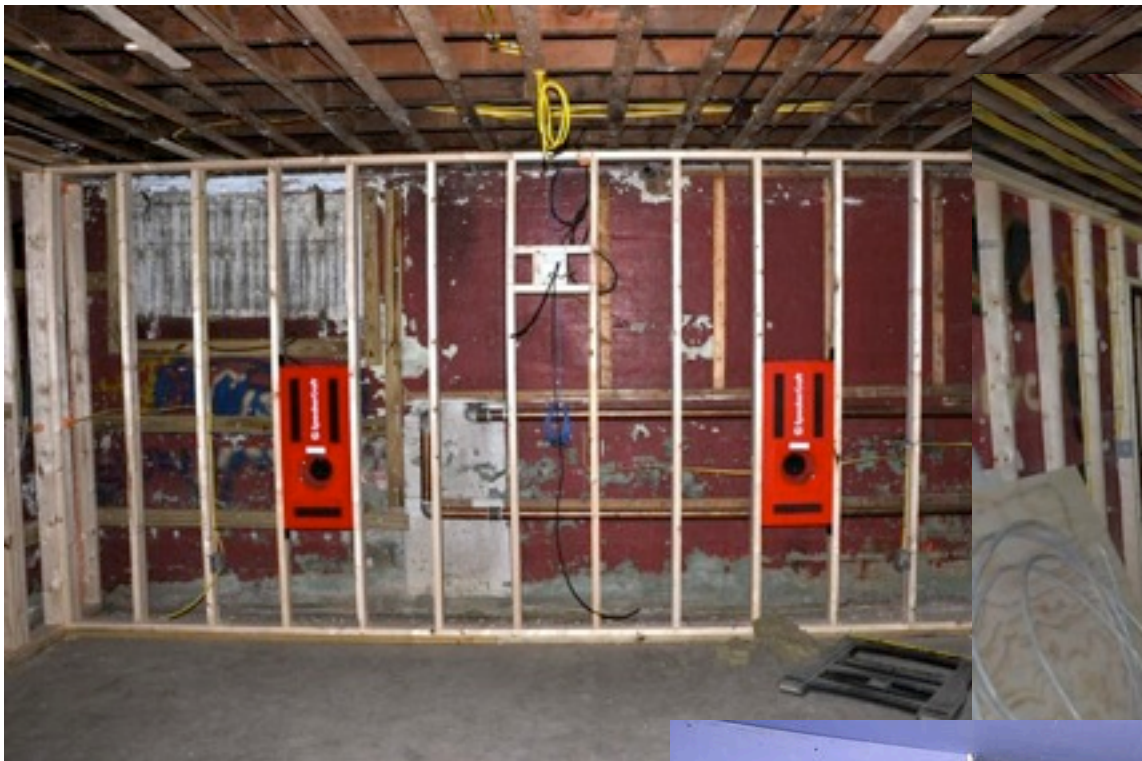

The view Jan. 4, 2010

Looking from where the old walk-in cooler used to be, and the old shower room, to where the stairs come down. Notice the windows on the right hand side walls.

And the view from just under the stairwell to the other end.

Party Room Jan. 4, 2010
You can see the bricks are still in the floor where the fireplace used to be.

The view from the back of the party room towards the old bar area, stairs on the left.

Jan. 4, 2010

In case anyone was wondering how they got the mud up on the hard to reach areas.
