

Insulation on the 3d floor  
sat 11-21-09

More insulation shots around the house on Sat. 11-21-09

Note that the ceilings are insulated as well as the walls.

There's enough insulation to make it library quiet and drown out the extraneous noise from the most boisterous person from the past ... I think ... It would also be tougher yelling for someone to get a hook with all the insulation as well as the walls in the center stairway.
